Special 17.0" Panel mount LCD with front controls and finished in RAL9011.

**KME has developed a comprehensive range of Panel mountable LCD Monitors for Industrial applications.**

Our philosophy is quite simple – we use LCD chassis monitors (29LS series) from our existing flat-panel industrial monitor range and integrate them with metal panels to industry-standard dimensions.

Panel Mount Monitors have a full range of controls at the rear and M4 threaded inserts enable bulkhead fixing. As a general rule, Panel mounted monitors are normally supplied finished in RAL 7032.

We know that there will be occasions when this standard range is not exactly suited to all customer requirements – and we remain willing to customise colours or dimensions to market demands.

8.4" Panel Mount LCD with VGA/PAL Interface.

### PANEL MOUNT FEATURES

- Minimum Dimensions in accordance with TFT panel size
- Painted in RAL 7032 (other colours available)
- Adjustment Controls at the Rear
- M4 x 12mm Threaded Fixings at Rear with gasket
- Toughened Non-Glare Safety Glass
- See separate 29LS datasheets for full specifications

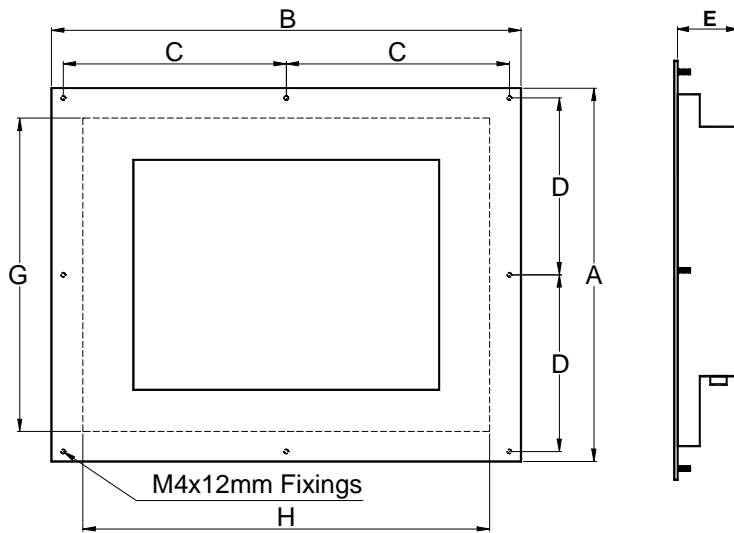

Due to a policy of continuous product development KME reserves the right to change specifications and descriptions without prior notification. All trade marks acknowledged. 29LP series 09/2004
